### Introduced by Senator Hancock

February 22, 2013

---

An act to add ~~Sections 52334.7 and 52334.8~~ *Section 52334.7* to the Education Code, relating to career technical education.

#### LEGISLATIVE COUNSEL'S DIGEST

SB 660, as amended, Hancock. Career technical education: funding.

Existing law provides funding for various career technical education programs, including regional occupational centers and programs, specialized secondary programs, partnership academies, and agricultural career technical education programs.

This bill would, ~~for the 2013–14 fiscal year, require the Superintendent of Public Instruction, using funds appropriated in the annual Budget Act for regional occupational centers and programs, to apportion from the amounts provided in the annual Budget Act for those purposes an amount to each county office of education in the same relative proportion of funding that the county office of education, school districts, and joint powers agencies within that county received in the 2012–13 fiscal year for those purposes. The bill would, for the 2014–15 fiscal year and each fiscal year thereafter, require the allocation made to those entities to be adjusted annually for increases in cost of living and for purposes of equalizing the per pupil allocations, as specified. The bill would authorize local educational agencies that operate career technical education programs to form into a Regional Career Technical~~

~~Education Collaborative to share in the cost of developing and maintaining a career technical education program based upon curricula aligned with the California Career Technical Education Standards and Common Core State Standards, and would require the apportioned funds to be expended only to ensure the development and maintenance of a high-quality career technical education program. The bill would require the governing board of each regional occupational center or program, California partnership academies, agricultural career technical education programs, and other career technical education programs, require county superintendents of schools and school districts, subject to existing expenditure requirements for the 2013–14 and 2014–15 fiscal years for the purpose of regional occupational centers or programs, to comply with specified requirements as a condition of receiving funds, including, among others, certifying to the State Department of Education that each course within a sequence is aligned to with the California Career Technical Education Standards and, where appropriate, the Common Core State Standards. The bill would require the Superintendent to incorporate various factors and quality indicators into the accountability measures for regional occupational centers and programs and other related programs, and would require the Superintendent to develop an evaluation instrument to evaluate the programs within each regional career technical education collaborative county office of education and school district commencing with the 2015–16 2014–15 school year. By imposing new requirements on specified county superintendents of schools and school districts, this bill would impose a state-mandated local program.~~

*The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.*

*This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.*

Vote: majority. Appropriation: no. Fiscal committee: yes.  
State-mandated local program: ~~no~~ yes.

*The people of the State of California do enact as follows:*
